2025 Amigos Medical Missions:

A Year of Presence and Care

In 2025, through the partnership of donors, medical teams, and local collaborators, **66,295 people received care** across Uganda, Burundi, and Nigeria. This work was not defined by a single event, but by a sustained commitment to bring medical access into communities where care is often limited or unavailable.

Through a total investment of **$185,000**, an estimated **$10,220,900 in medical care** was delivered. These figures reflect conservative U.S. cost equivalents and represent consultations, surgeries, diagnostics, pharmaceuticals, and ongoing clinical support provided across multiple outreach sites.

Care was delivered through an integrated system of medical response. Surgical and eye care camps restored sight through **985 cataract surgeries**, while **4,247 eyeglasses** and **3,610 eye clinic treatments** extended both immediate and preventative care. Across all locations, **12,773 medical consultations** and **939 cancer treatments** addressed both acute and chronic conditions, supported by laboratory testing and pharmacy services that sustained daily health needs.

Children remained central to this work. More than **3,900 children received care**, including **1,300 immunizations**, ensuring both immediate treatment and long-term protection. Pediatric surgical interventions, screenings, and follow-up care contributed to strengthening the health trajectory of families and communities.

This work was carried out across key locations, including **Ogul Village, Bihweju, Burpong, Odube, Pogo, Arua, regional sites in Burundi, and outreach locations in Nigeria**. Each site represents more than a point on a map—it reflects a community where care became present through coordination, trust, and local partnership.

Behind every number is a person. Individuals received life-altering surgical care, treatment for serious conditions, and access to services that would otherwise remain out of reach. These moments extend beyond the duration of each camp, contributing to longer-term healing, restored dignity, and strengthened local systems.

This year reflects not only what was delivered, but how it was delivered—through collaboration, continuity, and a commitment to serve with integrity. The work continues through ongoing relationships, follow-up care, and the shared belief that access to healthcare should not depend on geography.

Care was not delivered at a distance.
It was made present.
